Having a fast and reliable connection will allow your company to optimize the performance of your company and will increase the overall efficiency of your work. It will also help you connect with clients from around the world without service interruptions.

MEGACOM understands that reliable connectivity is a critical part of the operations of your company, so MEGACOM is providing various services to keep you connected.

MEGACOM is proud to partner with CR Digital.

CR Digital is a digital technology business specializing in the development of mining technology software and services.

MEGACOM shapes global mining through innovative technology solutions and collaborative partnerships towards a safer, more productive, and sustainable future.

Structured cabling is one of the most trustworthy, and easy to use solutions for interoffice communication. MEGACOM offers services to design and build your structured cabling equipment from the ground up, customizing it to fit your needs perfectly.

If your network is not performing to your satisfaction, MEGACOM can help. MEGACOM's technicians will troubleshoot, diagnose, and resolve your issues in a timely manner.

Fiber optic cabling is, bar none, one of the best communication solutions available for long-range transmission. MEGACOM provides all types of design, installation, and maintenance services for your fiber optic needs.

MEGACOM's team has the knowledge and ability to help with your all-important radio towers. Whether your antennas are down, need to be upgraded, or redesigned entirely, MEGACOM can do it.

Advanced POS systems can give your business, no matter how new or established, the flexibility and scalability it needs to pick up steam and roll past the competition. Advanced POS systems are a must-have for any business' operation that deals directly with the customer.

MEGACOM can provide your business with a state of the art POS system to help your business grow.

Every business, no matter how big or small, needs a proper security system. MEGACOM provides all kinds of security systems for all types of needs - whether for theft, hazardous conditions/materials, confidential information, or guest access, MEGACOM can ensure that your business is absolutely secured 24/7.

Wi-Fi has become the standard for home and business internet because of the freedom it provides. Any business can utilize Wi-Fi to their advantage as a tool for person-to-person or B2B communication, but it has also developed into an essential method for M2M communication as well.

MEGACOM's team can design, install, maintain, and repair the Wi-Fi setup of your dreams.

If your business has nothing else, it needs reliable internet, TV, and phone solutions. These traditional solutions have stood the test of time as a means to communicate with your clients, your customers, and your business partners.

MEGACOM can design and set up these services for your business and are even well-versed in more advanced services, such as VoIP.

MEGACOM doesn't believe in fitting your business to a stock solution. For that reason, MEGACOM provides MEGACOM's customers with an initial consultation. During this meeting, MEGACOM will discuss your business, its size, and your goals for the future.

After assessing your needs, MEGACOM does an on-site survey of the facility to determine the best course of action to take in regards to your specific circumstances.

When MEGACOM says that MEGACOM's specialists will build your system from the ground up, MEGACOM means that they start from the very beginning: the design. After the on-site survey, MEGACOM's team takes to the drawing board and works to provide your business the best, most cost-effective, efficient, and scalable solutions for you and your team.

Once MEGACOM is finished designing your customized systems, MEGACOM puts everything in place for you. MEGACOM install every system, make sure all of them are fully operational, and give you any advice you may need on the functionality of the system.

MEGACOM is proud to say that MEGACOM's systems are all turnkey solutions that are designed to your specifications.

MEGACOM's technicians are more than happy to conduct any maintenance or repair services necessary to keep your business up and running. From changing wires to rerouting entire systems, MEGACOM's team can help with any system issues that may arise in the future.

At MEGACOM, MEGACOM strives to stay ahead of the curve. MEGACOM only provides the best technology available for the systems MEGACOM install. That being said, MEGACOM knows the world of technology is changing at a breakneck pace.

MEGACOM can help you keep up by designing and implementing plug-and-play systems that work seamlessly with any previously installed systems.
